TECHNICAL SKILLS

Front End Development

- HTML, CSS, JS, Vue, React, Telerik

Back End Development

- ASP.NET MVC Framework, SQL, SSMS, Relational Databases
- Python, C, C++, C#, Java, Haskell, Elm, Prolog

Mobile Development

- Swift, Kotlin, Unity

RESTful APIs

- Entity Frameworks, Swagger

Tools & Methodologies

- Azure DevOps, Visual Studio
- CI/CD
- Agile, Scrum, Waterfall

Cloud Computing SaaS

- Salesforce Development

Machine Learning

- TensorFlow, PyTorch, scikit-learn

Data Science & Analysis

- Pandas, Numpy, Openpyxl
- Power BI, Excel

Automation Tools

- n8n

STRENGTHS

- Problem Solving & Debugging
- Analytical Thinking
- Organizational Skills
- Creativity & Innovation
- Collaboration & Teamwork
- Reliability
- Adaptability
- Research & Inquiry
- Continuous Learning
- Customer Advocacy

RELEVANT COURSES

Computing

- Software Development
- Applications of Machine Learning
- Databases
- Software Testing
- Algorithms and Complexity
- Data Mining
- Algorithms for Sequential Decison Making
- Information Security
- Design Human Computer Interfaces
- Concurrent Systems
- Operating Systems

Business

- Decision Making Data Analytics
- Operations Management
- Managerial Finance

Wyatt Habinski

Software Developer / Computer Scientist

Check out my personal website for more at wyatthabinski.com

PROFILE SUMMARY

Experienced software developer seeking full time opportunities in software and AI development, currently advancing my academic foundation through a M.S. in Artificial Intelligence at the University of Texas at Austin. Skilled in designing, developing, and deploying scalable applications with hands on exposure to AI and automation tools. Driven by a commitment to high quality work and continuous growth.

PROJECTS

DoodleAI

◊ Interactive sketch recognition web app that classifies drawings in real time using a custom built CNN trained on 1M+ samples, achieving over 90% accuracy with <100ms real-time inference..

DieSpy

◊ Android app that detects and counts dice in real time using a YOLOv10 model, achieving <100ms inference with over 90% accuracy. Includes Firebase auth, synced sessions, chat, and roll history.

Rari Racing

◊ Educational racing game devolved in Elm to help middle school students practice arithmetic.

Beatify

◊ Real time music visualizer that transforms audio frequencies into animated visual patterns.

Personal Website

◊ [Portfolio](#) to showcase projects, experience, technical skills and education, built with react.js

EXPERIENCE

Software Developer - AI Model Trainer (Freelance) at Data Annotation

06/2025–Current

◊ Completed 100+ coding-focused AI training tasks involving code generation, correction, and evaluation, improving model response accuracy and logical consistency.

◊ Analyzed model outputs to identify logical inconsistencies and edge cases, contributing to iterative improvements in model reasoning and reliability.

Automation Developer (Contract) at Building Science Investigations

08/2024–12/2024

◊ Defined and implemented an automated reporting tool to process Excel datasets and generate standardized Excel and Word deliverables, reducing manual reporting time by over 75% and eliminating recurring formatting errors.

Programming Analyst Intern (3 Summers) at HomeEquity Bank

05/2022–09/2024

◊ .NET Developer | Maintained and enhanced .NET applications, improving performance, response times, and user experience. Used Azure DevOps for CI/CD, enabling faster deployments and iteration. Designed, implemented and tested features with cross functional teams. Debugged and optimized code following best practices.

◊ Time-Tracking Web App | Led development of a full stack time tracking web application, transforming an existing database into a production system used daily by internal teams, handling hundreds of records and reducing manual tracking time by over 50%. Stack: VS 2022, SQL Server, Swagger, Entity Framework, Vue.js, Telerik UI. Ensured testing across environments and deployed via Azure DevOps; managed change requests.

◊ Salesforce Development (SaaS) | Created an algorithm to redact personal identification information for inactive clients and a batch process to auto identify and redact qualifying accounts across thousands of records. Contributed to sprint delivery via debugging, fixes, and refactors.

EDUCATION

M.S. - University of Texas at Austin

◊ Artificial Intelligence (Currently Enrolled)

B.A.Sc - McMaster University

◊ Honors Computer Science Co-op (with a minor in Business) | GPA: 3.9

◊ Dean’s Honours List, Graduated with Distinction
