Technical Skills

Front End Development
- HTML, CSS, JavaScript, TypeScript, Vue, React, Telerik
- Sass, Tailwind CSS, Webpack, Vite

Back End Development
- ASP.NET MVC Framework, Node.js, SQL, SSMS, Relational & NoSQL Databases (PostgreSQL, MongoDB)
- Python, C, C++, C#, Java, Haskell, Elm, Prolog

Mobile Development
- Swift, Kotlin, Unity

RESTful APIs
- Entity Framework, Swagger / OpenAPI, Postman, GraphQL

Testing
- Jest, Cypress, Playwright, JUnit, pytest, xUnit

DevOps & Infrastructure
- Azure DevOps, Git, GitHub, GitHub Actions
- CI/CD, Docker, Kubernetes
- Agile, Scrum, Waterfall

Cloud Computing
- Microsoft Azure, Salesforce Development
- AWS (EC2, S3, Lambda)

Machine Learning
- TensorFlow, PyTorch, scikit-learn, Keras, OpenCV
- Hugging Face, LangChain, Jupyter, MLflow

Data Science & Analysis
- Pandas, NumPy, Openpyxl, Matplotlib
- Power BI, Excel

Automation Tools
- n8n, Selenium, PyQt5

Project & Issue Tracking
- Jira, Confluence, Trello

Extra Curriculars

- Peer Tutor — Assisted classmates across multiple Computer Science courses with coursework and concept review
- Community Contributor — Actively engaged in peer course communities,
- Competitive Soccer & Hockey — Playing for over 20 years
- Intramural Volleyball & Badminton — McMaster University
- Independent Software Projects — Designed and built personal applications (see Projects) alongside coursework

Wyatt Habinski

Software Developer / Computer Scientist

Profile Summary

Experienced software developer seeking full time opportunities in software and AI development, currently advancing my academic foundation through a M.S. in Artificial Intelligence at the University of Texas at Austin. Skilled in designing, developing, and deploying scalable applications with hands on exposure to AI and automation tools. Driven by a commitment to high quality work and continuous growth.

Education

M.S. - *University of Texas at Austin*

◇ Artificial Intelligence (Expected 2027)

B.A.Sc - *McMaster University*

◇ Honors Computer Science Co-op (with a minor in Business) | **GPA: 3.9**

◇ Dean's Honours List, Graduated with Distinction

Experience

Software Developer - AI Model Trainer (Freelance) at *Data Annotation*
06/2025–Current

◇ Completed 100+ coding-focused AI training tasks involving code generation, correction, and evaluation, improving model response accuracy and logical consistency.

◇ Analyzed model outputs to identify logical inconsistencies and edge cases, contributing to iterative improvements in model reasoning and reliability.

Automation Developer (Contract) at *Building Science Investigations*
08/2024–12/2024

◇ Defined and implemented an automated reporting tool to process Excel datasets and generate standardized Excel and Word deliverables, reducing manual reporting time by over 75% and eliminating recurring formatting errors.

Programming Analyst Intern (3 Summers) at *HomeEquity Bank*
05/2022–09/2024

◇ .NET Developer | Maintained and enhanced .NET applications, improving performance, response times, and user experience. Designed, implemented and tested features with cross functional teams. Debugged and optimized code following best practices.

◇ Time-Tracking Web App | Led development of a full stack time tracking web application, transforming an existing database into a production system used daily by internal teams, reducing manual tracking time by over 50%. Ensured testing across environments and deployed via Azure DevOps; managed change requests.

◇ Salesforce Development (SaaS) | Created an algorithm to redact personal identification information for inactive clients and a batch process to auto identify and redact qualifying accounts across thousands of records. Contributed to sprint delivery via debugging, fixes, and refactors.

Projects

DoodleAI
◇ Interactive sketch recognition web app that classifies drawings in real time using a custom built CNN trained on 1M+ samples, achieving over 90% accuracy with <100ms real-time inference..

DieSpy
◇ Android app that detects and counts dice in real time using a YOLOv10 model, achieving <100ms inference with over 90% accuracy. Includes Firebase auth, synced sessions, chat, and roll history.

Rari Racing
◇ Educational racing game devolved in Elm to help middle school students practice arithmetic.

Beatify
◇ Real time music visualizer that transforms audio frequencies into animated visual patterns.

Personal Website
◇ Portfolio to showcase projects, experience, technical skills and education, built with react.js
